Frontend Engineer | React | TypeScript | Product-Focused Web Applications | Performance & Architecture

Professional Summary

Frontend-focused software engineer with 10+ years of experience building scalable web applications, with strong expertise in React and TypeScript. Experienced in collaborating across product, backend, and design teams to ship reliable features at scale, with additional full-stack experience in Python (Django/Flask) and API integration.

Technical Skills

Languages: TypeScript, JavaScript

Frontend: React, Redux, Redux-Saga, React Hooks, Ember, React Native

Backend (additional experience): Node.js, Django, Flask, Express

Testing: Jest, React Testing Library, Cypress, Pytest

Databases: PostgreSQL, SQLite

DevOps / Tools: Git, GitHub Actions, CI/CD pipelines

Practices: Agile development, cross-team collaboration, performance optimisation, responsive web applications

Professional Experience

Senior Software Engineer – Eclipse Veterinary Ltd (Remote)

Jan 2023 – Present

- Leading frontend development of the React-based Hospital Module, modernising the UI layer of a large-scale enterprise veterinary platform
- Designing and delivering complex workflow-driven product features supporting the full journey from patient admission through treatment and discharge
- Worked closely with stakeholders and product teams to translate complex real-world operational processes into fast, intuitive, user-facing workflows

- Focused on frontend maintainability, performance, and scalability in an enterprise environment integrated with a legacy 4D backend
- Contributed backend services and integration layers where required to support end-to-end product delivery

Tech Stack: React, JavaScript, 4D

Senior Frontend Engineer – Iotic Labs (Remote)

Sep 2019 – 2022

- Delivered complex frontend applications using React and TypeScript, supporting large-scale data workflows and improving usability of data-heavy interfaces
- Designed and implemented reusable UI components, reducing duplication and improving development speed across the codebase
- Optimised React rendering performance by reducing unnecessary re-renders, significantly improving UI responsiveness in data-heavy interfaces
- Delivered backend services using Python (Django/Flask), supporting core application functionality and data processing workflows
- Collaborated with backend teams to integrate APIs and business logic into user-facing features, ensuring reliable and consistent data flow
- Mentored developers and supported onboarding of new team members, helping them become productive more quickly within the team

Tech Stack: React, TypeScript, Redux, Testing Library, Jest, Python, Django, Flask, PostgreSQL, Cypress

Front-End Developer – Smart Pension Ltd (London)

Aug 2018 – Sep 2019

- Developed and maintained frontend applications using React and Ember, supporting core product functionality and improving user experience
- Transformed complex financial data into intuitive user interfaces, enabling faster decision-making for users and reducing reliance on manual data interpretation
- Worked closely with backend teams to integrate APIs and business logic into user-facing features
- Mentored junior developers and supported onboarding

Tech Stack: React, Ember, Redux, TypeScript, Cypress

Software Developer – KM Software Systems (Royston)

Oct 2014 – Jun 2018

- Designed and implemented enterprise software modules and system integrations
- Developed reporting tools supporting business decision-making and improving access to operational data

Software Engineer – EPAM Systems (Budapest)

2013 – 2014

- Developed frontend tools using Delphi and JavaScript for stock exchange connectivity
- Integrated market data feeds into financial systems

Software Developer / Administrator – Igepa Paper Hungary Kft, Hungary

2008 – 2013

Developed enterprise business systems using Microsoft Dynamics AX 4.0 (MorphX / X++)

Built internal web and e-commerce solutions using JavaScript, PHP, and Node.js

Delivered BI and reporting solutions using SSRS, OLAP, and Analysis Services

Game Developer – Brainfactor Entertainment Kft, Hungary

2004 – 2008

Worked on commercial 3D game titles using C++, Lua, OpenGL, and DirectX

Developed engine-level systems including particle effects, camera logic, 3D audio, and GUI components

Built gameplay scripting and level tooling workflows using Lua and 3DS Max

Education

BSc Software Information Technologist – University of Nyíregyháza, Hungary (2008–2011)

Additional Information

Remote work experience since 2019

Experience in fintech, SaaS and enterprise software environments

Strong focus on clean architecture and performance optimisation
